MOTeK REPRESENTS THE PERFECT COMBINATION BETWEEN TRADITION AND INNOVATION

- **TRADITION** We make the highest quality products, and provide great customer service, delivered by our team with individual pride in our motors and our company.
- **VALUES** We value and recognize the contribution and commitment of our people, within our organization and our community
- **PASSION** Engineering designs that are vital in providing a better product, ensuring our connection to developing markets, and offering the widest range of custom motor solutions to various industries
- **INNOVATION** To continuously developing new products, meet the needs of our customers, strengthening our team, and excelling in the global electric motor market.

MOTeK electric motors is a young, dynamic and flexible company that offers a wide range of three-phase and single-phase asynchronous motors (with or without brake), including flat extruded motors with Seimec brand, mostly used in industrial field.

All MOTeK motors are produced in Italy in order to guarantee the quality expected by the customer. Our goal is to provide functionality and efficiency as well as a dedicated customer care.

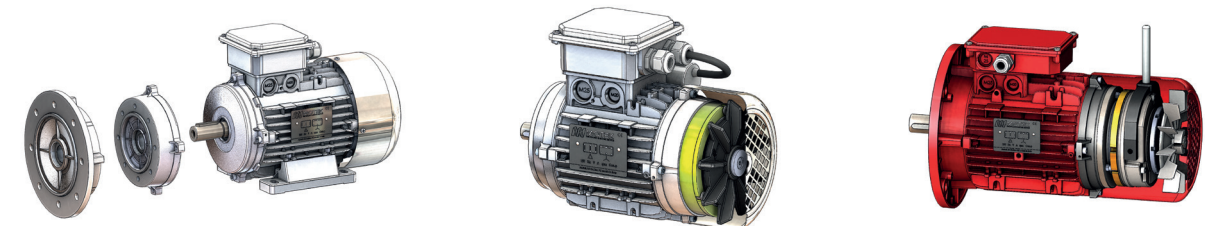

The UL/CSA approval allows Motek customers to expand their market to North America.

According to the UL follow-up, all our certified motors are listed on the UL website under file E365718.

MOTeK provides IE2 and IE3 electric motors as well, which play a key role in the reduction of the worldwide energy consumption.
